

Cutting Edge Protection

End grain preservative for Tanalised treated timbers

Approved by the Biocidal Products Regulations, Ensele Tanalised End Grain Preservative offers added protection against fungal and insect attack of exposed cross-cut, notched or drilled surfaces of M&M treated timbers.

Easily applied by brush, the water based preservative gradually blends with the natural green colouration of Tanalised treated timbers.

Maintains integrity of Tanalised treated timbers following modification

Easy to apply to exposed areas by brush

Supplied in re-sealable 1kg and 5kg containers

5kg Can
£21.15
 EX VAT

1kg Can
£8.85
 EX VAT

Use wood preservative safely.
 Always read the label and product information before use.
