

A complete range of **playground** timber

M&M Timber manufacture and supply a wide range of timber products to the playground equipment industry throughout the UK, specifically for educational and play structures and other outdoor leisure applications.

The PlayGuard range has been specially developed using Radiata pine to open up exciting new possibilities in innovative design projects that combine flexibility with durability and ease of maintenance.

PlayReady is supplied with a 15-year service life warranty*. The PlayGuard range, along with bespoke component machining services, offers specialist manufacturers of play and outdoor leisure equipment tremendous scope for imaginative custom made projects.

PlayGuard™ is benchmark approved by the Wood Protection Association.

The PlayGuard logo, featuring a stylized green tree icon to the left of the text 'PlayGuard' in green and '15' in white on a green arrow pointing right. Below the text is a blue banner with the text 'TIMBER FOR PLAYGROUNDS' in white.

TIMBER FOR PLAYGROUNDS

SAFETY IN DESIGN

Manufactured by M&M Timber to meet the high quality and safety requirements of the play and leisure industry, PlayGuard timbers have been specially developed for use in playgrounds and other educational and leisure applications, such as creative play areas and sports zones.

In addition to the standard range of PlayGuard products, M&M Timber can also provide designers and playground equipment manufacturers with a variety of specially machined components to enable them to construct imaginative and specific educational themed facilities.

M&M's highly experienced and skilled teams of craftsmen are able to machine timber components to any specific design or drawing and supply fully machined timbers in kit form for on-site assembly.

Typically, PlayGuard projects feature in:

- Schools and educational facilities
- Local authority play areas
- Landscaped community areas
- Parks and large gardens
- Public houses and leisure facilities
- Theme parks
- Holiday parks and caravan sites
- Woodland and picnic areas

Utilising only timber selected from high quality Radiata pine, which has inherent low-split properties and therefore minimises finger traps, PlayGuard timbers are kiln dried and pressure treated with wood preservative for durability and supplied with a 15-year service life warranty*.

All PlayGuard products can be stained or painted to match any outdoor schemes. Surfaces are fully sanded and post ends can be chamfered to add to user comfort.

*Terms and conditions apply.

Bespoke design and machining service includes:

- Cutting & Angle Cutting
- Side Angle & Top Scalloping
- Drilling & Counterboring
- Slabbing
- Chamfers
- Counter Boring
- Blind Mortice, including Top Scallop
- Etching & Engraving
- Deep & Shallow Mortice
- Pencil Top, Dome Tops, Routing
- Routing
- Mortice Slots
- X-Hatching & Cross Hatching
